

Circulation Pumps

High Performance Industrial Pumps

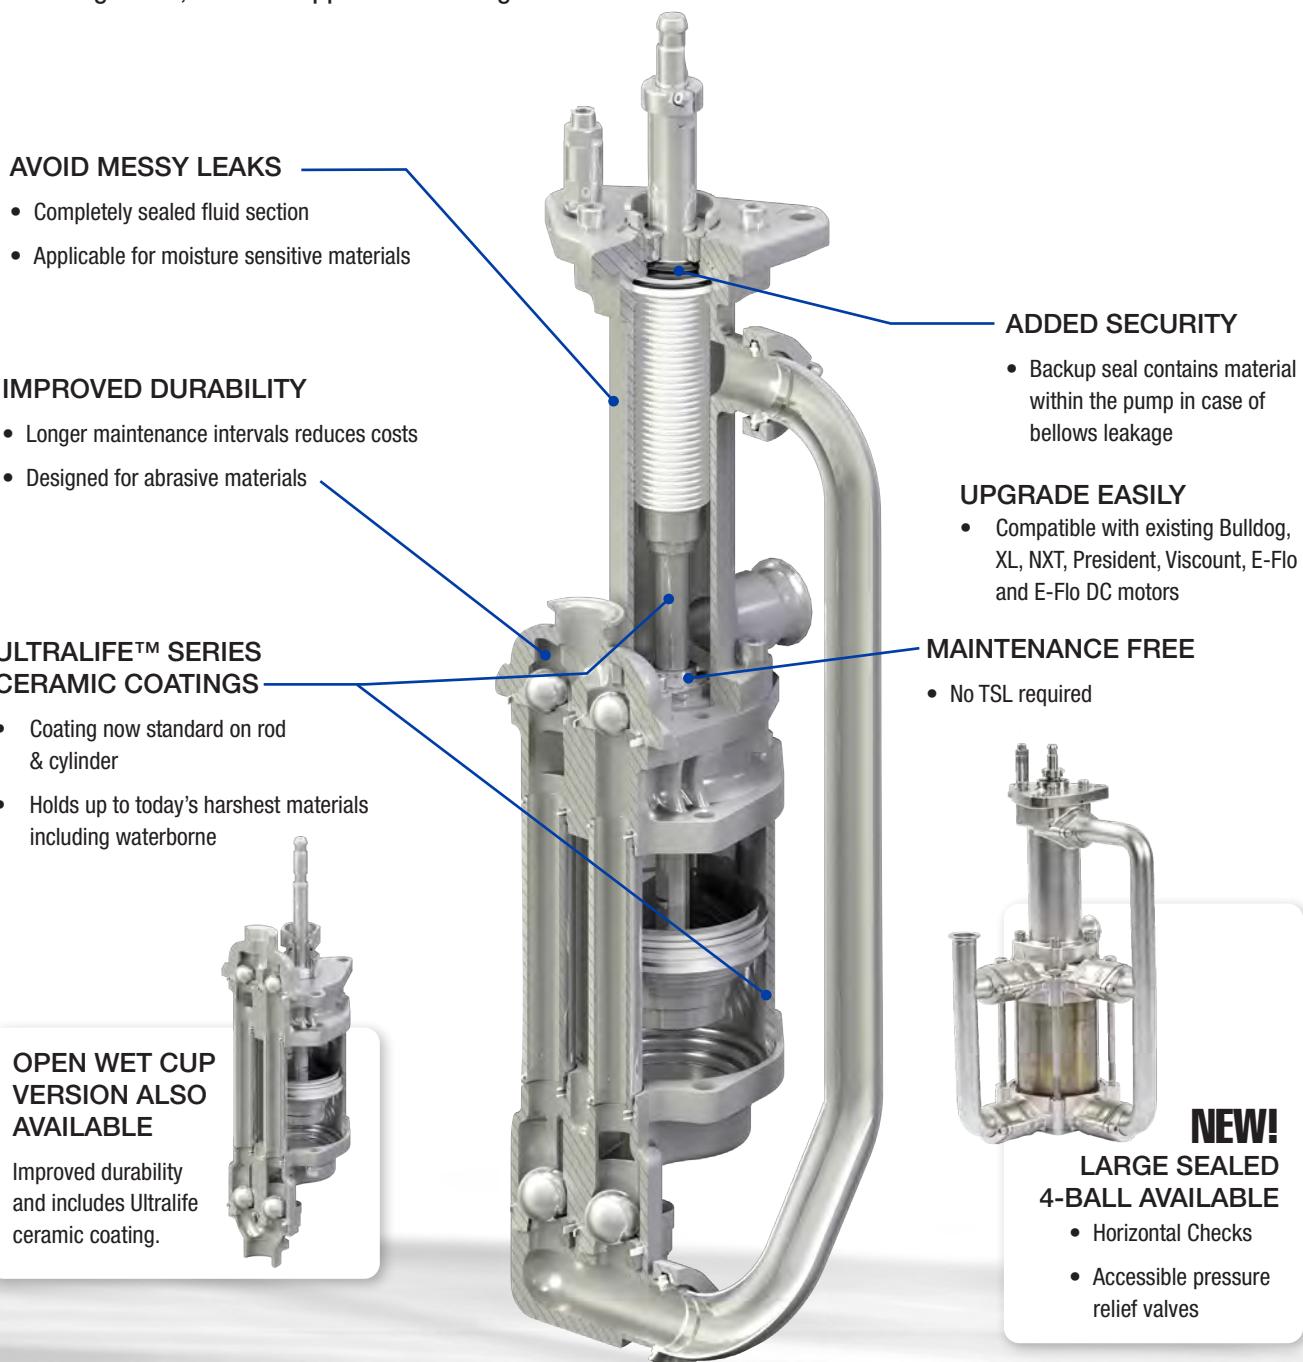

PROVEN QUALITY. LEADING TECHNOLOGY.

Minimize Downtime & Reduce Costs

with Graco's Sealed 4-ball Lowers

Downtime is frustrating and costly. To help keep you up-and-running and keep expenses in check, Graco's sealed lower not only has longer maintenance cycles, but it is also easier, faster and cheaper to replace than an entire pump assembly. Because the lower is completely sealed, it can be used for every pumping application in your mix room, including catalyzed coatings. Common components make it simpler to maintain your pump, and it reduces inventory level on repair parts.

Plus our positive displacement piston pumps displace fluid in both directions of the stroke, providing low cycle rates and high flow, ideal for applications using shear-sensitive materials.

Which System is Right for You?

No matter your need, Graco has a pump for your circulation application. Whether it's electric, pneumatic or hydraulic, Graco pumps help you get the job done right with superior results.

And because our sealed 4-ball lower is compatible with most Graco motors, it's a great option for new or existing installations.

Electric Piston Pumps

Make the Switch to Savings

Get the benefits of a pneumatic motor with the energy efficiency of an electric drive unit!

Our E-Flo® DC (Dual Control) electric circulating pump has been found to be up to five times more efficient than similar sized pneumatic pumps – lowering your energy bill and saving you money. Quiet pumping technology means you get a better work environment, and advanced features allow you to prevent costly material loss and rework.

Why Choose E-Flo DC Electric?

Save Energy

Up to 5x more efficient than pneumatic

Prevent Material Loss

Integrated runaway protection protects your pump from premature wear and prevents costly material loss

Eliminate Costly Rework

Electric motor eliminates icing – giving you smoother pump operation and better finished product

Improve Quality

Less pulsation and smooth, rapid changeovers – for better, more consistent finishes

Improve Work Environment

Quiet electric motor

Easy Installation

Requiring either 220 volt single phase or 380-480 volt 3-phase power.

No VFD required.

E-Flo DC

Output up to 2500 cc/cycle

Legacy E-Flo

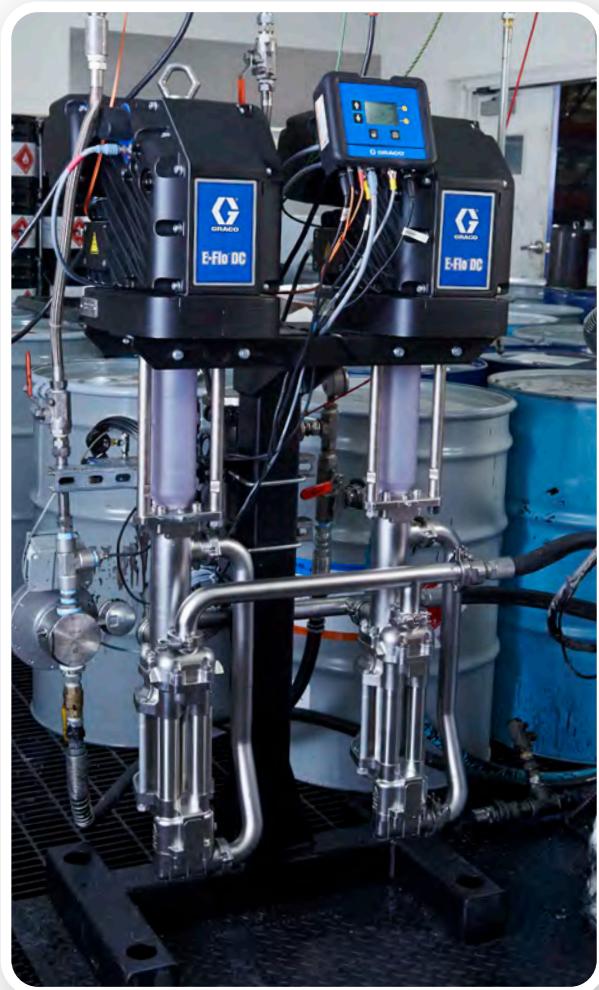

Output up to 4000 cc/cycle

Achieve Higher Flow Rates

We doubled our original 4-ball DC circulation pump technology to give you less pulsation, increased flow rates and less downtime.

Unlike competitive pumps that are linked and controlled together, E-Flo DC's lowers operate independently. This allows the pump to adjust to varying pressure and flow rate demands thousands of times per second resulting in minimal pressure fluctuations.

Each pump can also run alone to keep production running if maintenance is required.

E-Flo DC High Flow Rate
Output up to 5000 cc/cycle

E-FLO DC Supply Pump

Our supply pump features an energy efficient electric motor that stalls under pressure and changes speeds to maintain constant pressure. This 2-ball electric supply pump is ideal for your high pressure applications such as waterborne spraying or circulation of high-viscosity materials.

Reasons to buy the E-Flo DC Supply Pump:

- **Efficiency:** 5x more efficient than an air motor
- **Dual Control (DC) Modes:** Maintains either a constant pressure or a constant flow rate
- **Local Control:** Easy control with two knobs
- **Easy Installation:** Requiring either 220 volt single phase or 380-480 volt 3-phase power. No VFD required.
- **Integrated Runaway Protection:** Prevents material loss and premature wear to the pump
- **Multiple Sizes Available:** 290 cc, 220 cc, 180 cc, and 145 cc displacement lowers

E-Flo DC Supply
Maximum pressure of 3000 psi (206 bar)

Use less energy and spend less on maintenance costs with the field-proven reliability of Graco's 2- and 4-ball pumps.

Improve Productivity

Electric pump functionality, with the simplicity of a pneumatic pump, means less time training.

Increased reliability means you'll spend less time maintaining and more time up and running.

Quiet electric motor means happier operators and better results. Exceeds OSHA sound regulations and over 20 dBA's quieter compared to similar-sized pneumatic motors.

Note: All pressures 100 psi

Control Module & Cable

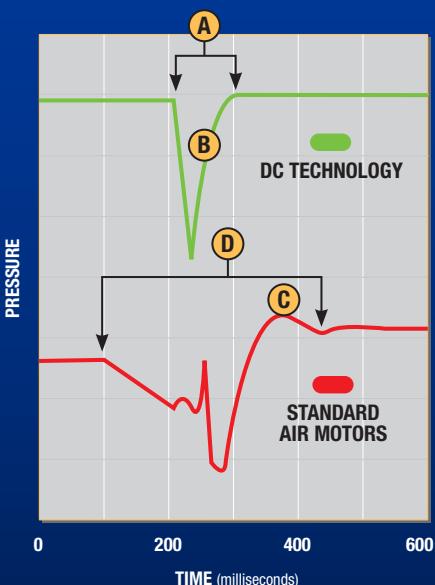

If **Basic** motor control is desired, your pump selection is complete.

If **Advanced** motor control is desired, a Control Module and CAN Cable will be required. Determine the desired mounting location of the Control Module. The Control Module can be mounted directly on the pump or on a nearby wall. Select the appropriate CAN cable length from the table below.

High flow rate circulation pumps (2X) include the Control Module and CAN Cable. No additional equipment is required.

Part Number	Description
24P822	Control Module Kit (240v)
17V232	Control Module Kit (480v)
16P911	3 ft (1 m) CAN Cable
16P912	25 ft (8 m) CAN Cable
25D600	Serial to Fiber Kit
16M173	100 ft Fiber Cable
17B160	320 ft (room) Fiber Cable

Changeover Comparison

- (A) Less than 0.09 second changeover
